

This document contains screenshot evidence collected during the RoadWatch frontend audit. Findings, recommendations, changes made, and final audit conclusions are documented separately in the Frontend Audit Report. No backend modifications were made as part of the frontend audit.

Frontend Running

```
PS C:\Users\Admin\Downloads\RoadWatch-main> (Invoke-WebRequest http://localhost:5000/api/health).Content
{"status":"ok","database":"connected"}
PS C:\Users\Admin\Downloads\RoadWatch-main>
```

Backend Health

```
PS C:\Users\Admin\Downloads\SOFTENGI_Project-main\frontend> npm run lint
> frontend@0.0.0 lint
> oxlint

  ▲ react(set-state-in-effect): Calling setState synchronously within an effect can trigger cascading renders
  [src/App.jsx:110:7]
106
107   useEffect(() => {
108     .   This is the containing effect
109     const token = localStorage.getItem("token");
110     if (!token) {
111       setAuthLoading(false);
112     }
113     .   Avoid calling setState() directly within an effect
114     return undefined;
115   }
116
  help: Effects should synchronize React with external systems. Calling setState synchronously inside an effect starts another render and is usually unnecessary. Derive the value during render, initialize state directly, or update it from the event that caused the change. Use an effect only when synchronizing with an external system.
  note: React Compiler skipped optimizing this component or hook. Additional guidance: https://react.dev/reference/eslint-plugin-react-hooks/lints/set-state-in-effect

Found 1 warning and 0 errors.
Finished in 240ms on 24 files with 104 rules using 4 threads.

Login Required Validation

The image shows a login form for 'RoadWatch', a Public Infrastructure Monitoring System. The form is centered on a dark blue background. It features the 'RW' logo at the top, followed by the title 'RoadWatch' and the subtitle 'Public Infrastructure Monitoring System'. Below this, there are two input fields: 'Email Address' with the placeholder 'invalid@example.com' and 'Password' with a masked password '*****'. An inline error message, 'Invalid email or password.', is displayed in a red box below the password field. A yellow 'Log In' button is positioned below the error message. At the bottom, a link 'Don't have an account? Create Account' is visible.

Invalid Credentials Inline Error

The image shows a registration form for 'RoadWatch'. The form is centered on a dark blue background. It features the 'RW' logo at the top, followed by the title 'Create Account' and the subtitle 'Join RoadWatch and help monitor your community.' Below this, the form is divided into three sections: 'Personal Information', 'Address', and 'Account Information'. The 'Personal Information' section includes fields for 'First Name', 'Last Name', 'Birthday' (mm/dd/yyyy), and 'Mobile Number' (09XXXXXXXX). The 'Address' section includes fields for 'House No.', 'Street', 'Barangay', and 'City'. The 'Account Information' section includes fields for 'Email Address', 'Password' (with a note 'Minimum 6 characters'), and 'Confirm Password'. A yellow 'Create Account' button is positioned below the 'Account Information' section. At the bottom, a link '← Back to Login' is visible.

Submission Process

01 Submit

Send your infrastructure concern.

02 Verify

An inspector reviews your report.

03 Assign

The issue is assigned for action.

04 Track

Follow the repair progress.

A screenshot of the Roadwatch app interface. In the center, a modal window displays the Roadwatch logo (a stylized 'RW' with a green checkmark), the word 'Success', and the message 'Your report has been submitted successfully.' Below this is a yellow 'Continue' button. The background is a blurred view of the app's main screen, which shows a list of reports and a sidebar with navigation options like 'Dashboard', 'Submit Report', 'My Reports', and 'Profile'.

This image shows a mobile application interface for recording inspection findings and making a review decision. The interface is displayed on a smartphone screen with a dark blue background.

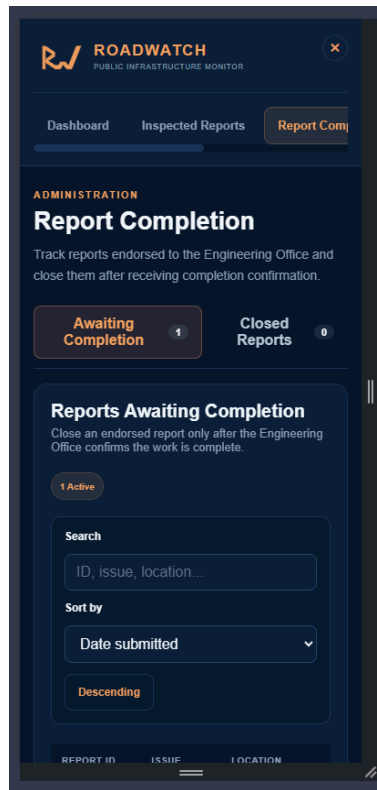

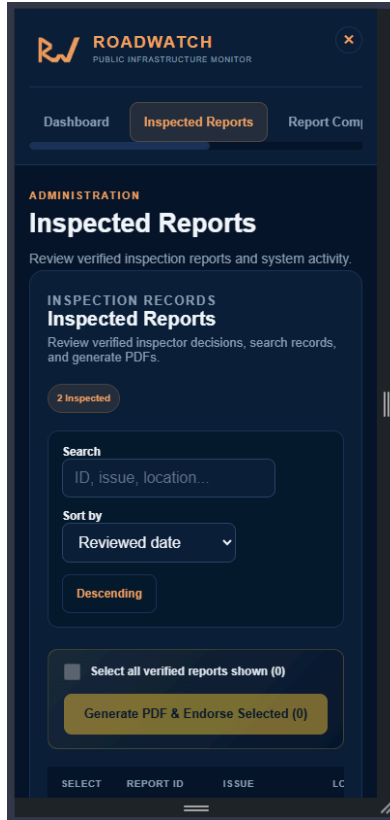

User Profile: At the top, the email address "phylcia@gmail.com" is displayed.

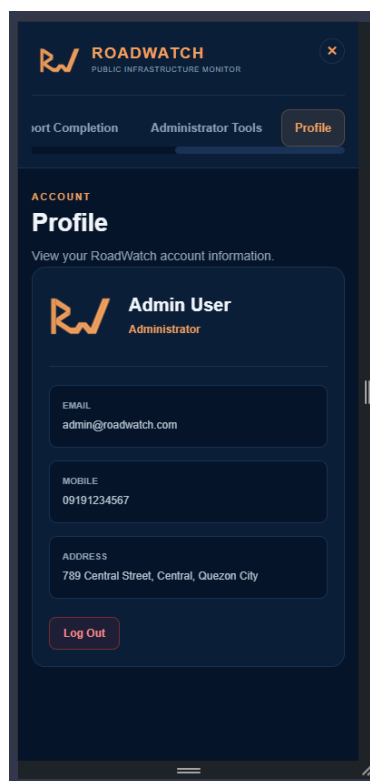

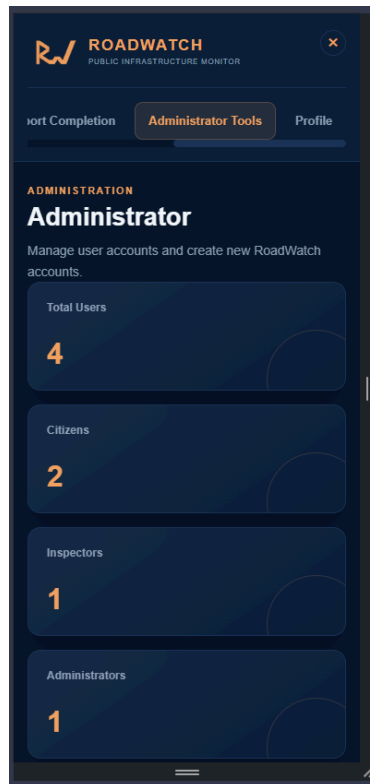

Inspection Decision: This section prompts the user to "Record your findings before submitting a verification decision." It includes a "Recommended Priority" dropdown menu currently set to "Medium" and an "Inspector Notes" text area with the placeholder text "Describe what you found and the recommended action."

Review Decision: This section prompts the user to "Choose an action based on your verification." It features three buttons: "✓ Verify Report" (yellow), "Reject Report" (red), and "Request More Information" (blue).

Final Git Change-Scope Verification

Final Evidence Status: PASS

Screenshot evidence confirms successful validation of the RoadWatch frontend across Citizen, Field Inspector, and Administrator workflows. Responsive behavior, accessibility improvements, production build validation, source-code checks, and Git change-scope verification were completed successfully. All audit modifications remained within the frontend scope, with no backend files modified.
